

# Land Surveying Services

The DRH team of surveyors has over 100 years of experience in the completion of all types of surveys. With those years comes an understanding of client needs and the importance of listening. Our surveyors know they are not simply collecting data, but that what they collect and how they collect it will have an impact on the end result and the client's bottom line.

Boundary/Topo/Utility Surveys/Const. Stakeout  
Fauquier Hospital -- Warrenton, VA

Whether handling a single lot stakeout survey or a control survey covering an extensive area, DRH seamlessly coordinates project phasing and manages costs, while providing its clients with individual attention, quality assurance and reliable results. In order to provide timely and accurate surveys our surveyor's use the latest technology including Global Positioning Surveys (GPS), electronic data collectors and total stations.
